

FOR IMMEDIATE RELEASE

Cloud Computing EAM Solution Achieves Perfection

Greenville, SC – February 24, 2011 – AssetPoint, a leading Enterprise Asset Management (EAM) solution provider, announced its TabWare Cloud Computing solution achieved 100% uptime for its customers during the 2010 calendar year.

TabWare is the leading EAM solution for companies who want full functionality without the expense, resources and time other solutions demand. Designed by maintenance professionals for maintenance professionals, TabWare is proven to maximize asset performance, resulting in maximum uptime and higher profit margins. The TabWare Cloud Computing solution is hosted by AssetPoint in an SAS-70 Type II audited environment, and customers access their data through a secure, password protected internet link. It's designed to handle all customer locations from a secure database, giving views of their operation at a site, region, division, country and enterprise levels.

Kay Jenkins, AssetPoint's Executive Vice President of Research and Development, said, "AssetPoint is committed to our customers' success. Providing 100% uptime for our TabWare Cloud Computing customers is our goal every year, and our customer support team will continue to strive for this perfect level of support every year."

AssetPoint President and CEO Mike Levine commented, "This once again proves AssetPoint's commitment to Cloud Computing. We are leading the way in the EAM market with our Software as a Service (SaaS) solution which benefits customers by removing the effort of hosting the EAM on their own servers. AssetPoint has been offering a Cloud Computing solution since 1998, and we have the best support in the industry."

With the TabWare Cloud Computing solution, companies will not need an IT staff to support the product as there are no servers needed, no database licenses to buy, and no backup/recovery services to perform as AssetPoint handles it all. Performance tuning, software maintenance and upgrades are also performed by AssetPoint's Microsoft Certified Professionals (MCPs).

Companies can streamline their maintenance operations to maximize asset performance and control maintenance costs with TabWare. AssetPoint also offers an on-site deployment for companies that want TabWare on their own servers. TabWare is the leading EAM solution for companies who want full functionality without the expense, resources and time other solutions demand. TabWare is easy to learn, easy to use, and easy to own.

About AssetPoint:

AssetPoint, makers of TabWare, is the leading provider of EAM solutions for companies whose success depends on the performance of their assets. For over 30 years, AssetPoint has led the market in helping customers control their maintenance costs, optimize spare parts inventory, streamline procurement and improve management, command and control.

Built by maintenance professionals for maintenance professionals, our TabWare platform is easy to learn, easy to use and proven over time to be the most effective product in the market. That's why thousands of users trust their critical assets to TabWare each and every day.
